Miguel Mateos

Product Designer | Design Systems & Accessibility

I am Miguel Mateos, Product Designer with more than 8 years of experience creating innovative, sustainable and accessible digital solutions. Specialized in Design Systems and digital accessibility.

During these years I have led end-to-end projects, from generative research to development handoff and post-launch follow-up, always seeking real impact
.
I love design because it is a process to solve problems that affect the experience and feeling of the user.

Experience in the following industries: Banking and Insurance, Retail, Human Resources, Telecom, Edtech, etc...

Love to continue learning every day, surrounding myself with professionals to create new concepts and explore new design tools and AI assistants.

The three quotes that best define me are:

"Design is not decoration, it's an action plan", "The form follows the function", "To innovate is to grow".
